PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 5274 SESSION NUMBER: 01
DATE OF SESSION: 15 MAY 89 DATE OF REPORT: 11 JUL 89
START: 1350 END: 1454
METHODOLOGY: SOLO VIEWER IDENTIFIER: 018

1. (S/NF/SK) MISSION: Locate target personality from a map of the US. Describe and identify the target personality.
2. (S/NF/SK) VIEWER TASKING: Viewer 018 tasked with requirements reflected in Para 1, above.
3. (S/NF/SK) COMMENTS: Assigned project number was 8974. Encrypted Coordinates incorrectly and inadvertently indicated as 8974. 018 continued to work with 8974 as a coordinate; finally relinquished and indicated a start signal as "target." A Summary of Information is attached to this report. Report loss in 018's personal file, until follow-up endeavor pursued by OPS.
4. (S/NF/SK): EVALUATION: (3) Para 3 of Session 1 has value.
5. (S/NF/SK) SEARCH VALUE: (1) Several methods attempted in quick session....possible frustration....impatience.

WORKING PAPER

Project: 8974
Date: 890515
Viewer: 018
Session: 01

SUMMARY OF INFORMATION:

- I kept wondering why couldn't we?*
1. (S/NF/SK) This session, like others, began with a very strong AI that the coordinates/cueing were wrong. This is not logical since the cueing, in this case, is the site number. Fighting this AI only made it worse. I finally decided to believe what my mind was telling me, and changed the cueing to simply "target", so I could ignore the provided cueing. The AI was gone, but 20 minutes of frustration had damaged the session. I am absolutely certain that something is wrong with the cueing for this target.
 2. (S/NF/SK) I finally accessed a wide, open, sandy area with low, even vegetation, and a very "stuffy" feel to the air. There was one very tall, round structure, and another which was low and appeared to have a "wavy" roof, like corrugated metal or plastic (see sketches, bottoms of pages 4&5). The weather was bright and sunny. I had the impression that this area normally had lots of bright, sunny days.
 3. (S/NF/SK) I got very little physical description of the target person. He was wearing a suit, but gave the impression that he just isn't normally a "suit-type" person. He is wearing the suit because he is working on some socially important "cause" or "crusade". He is a cause-oriented type of person. He has a strong dependence on a tall, thin female who is an integral part of his life. I kept finding him in "folksy" or "rural" settings.
 4. (S/NF/SK) The early frustration of the session took its toll, and I ended the session, postponing finer details and search to the next session.

WORKING PAPER

Project: ²³⁸8974
Date: 890516
Viewer: 018
Session: 02

SUMMARY OF INFORMATION:

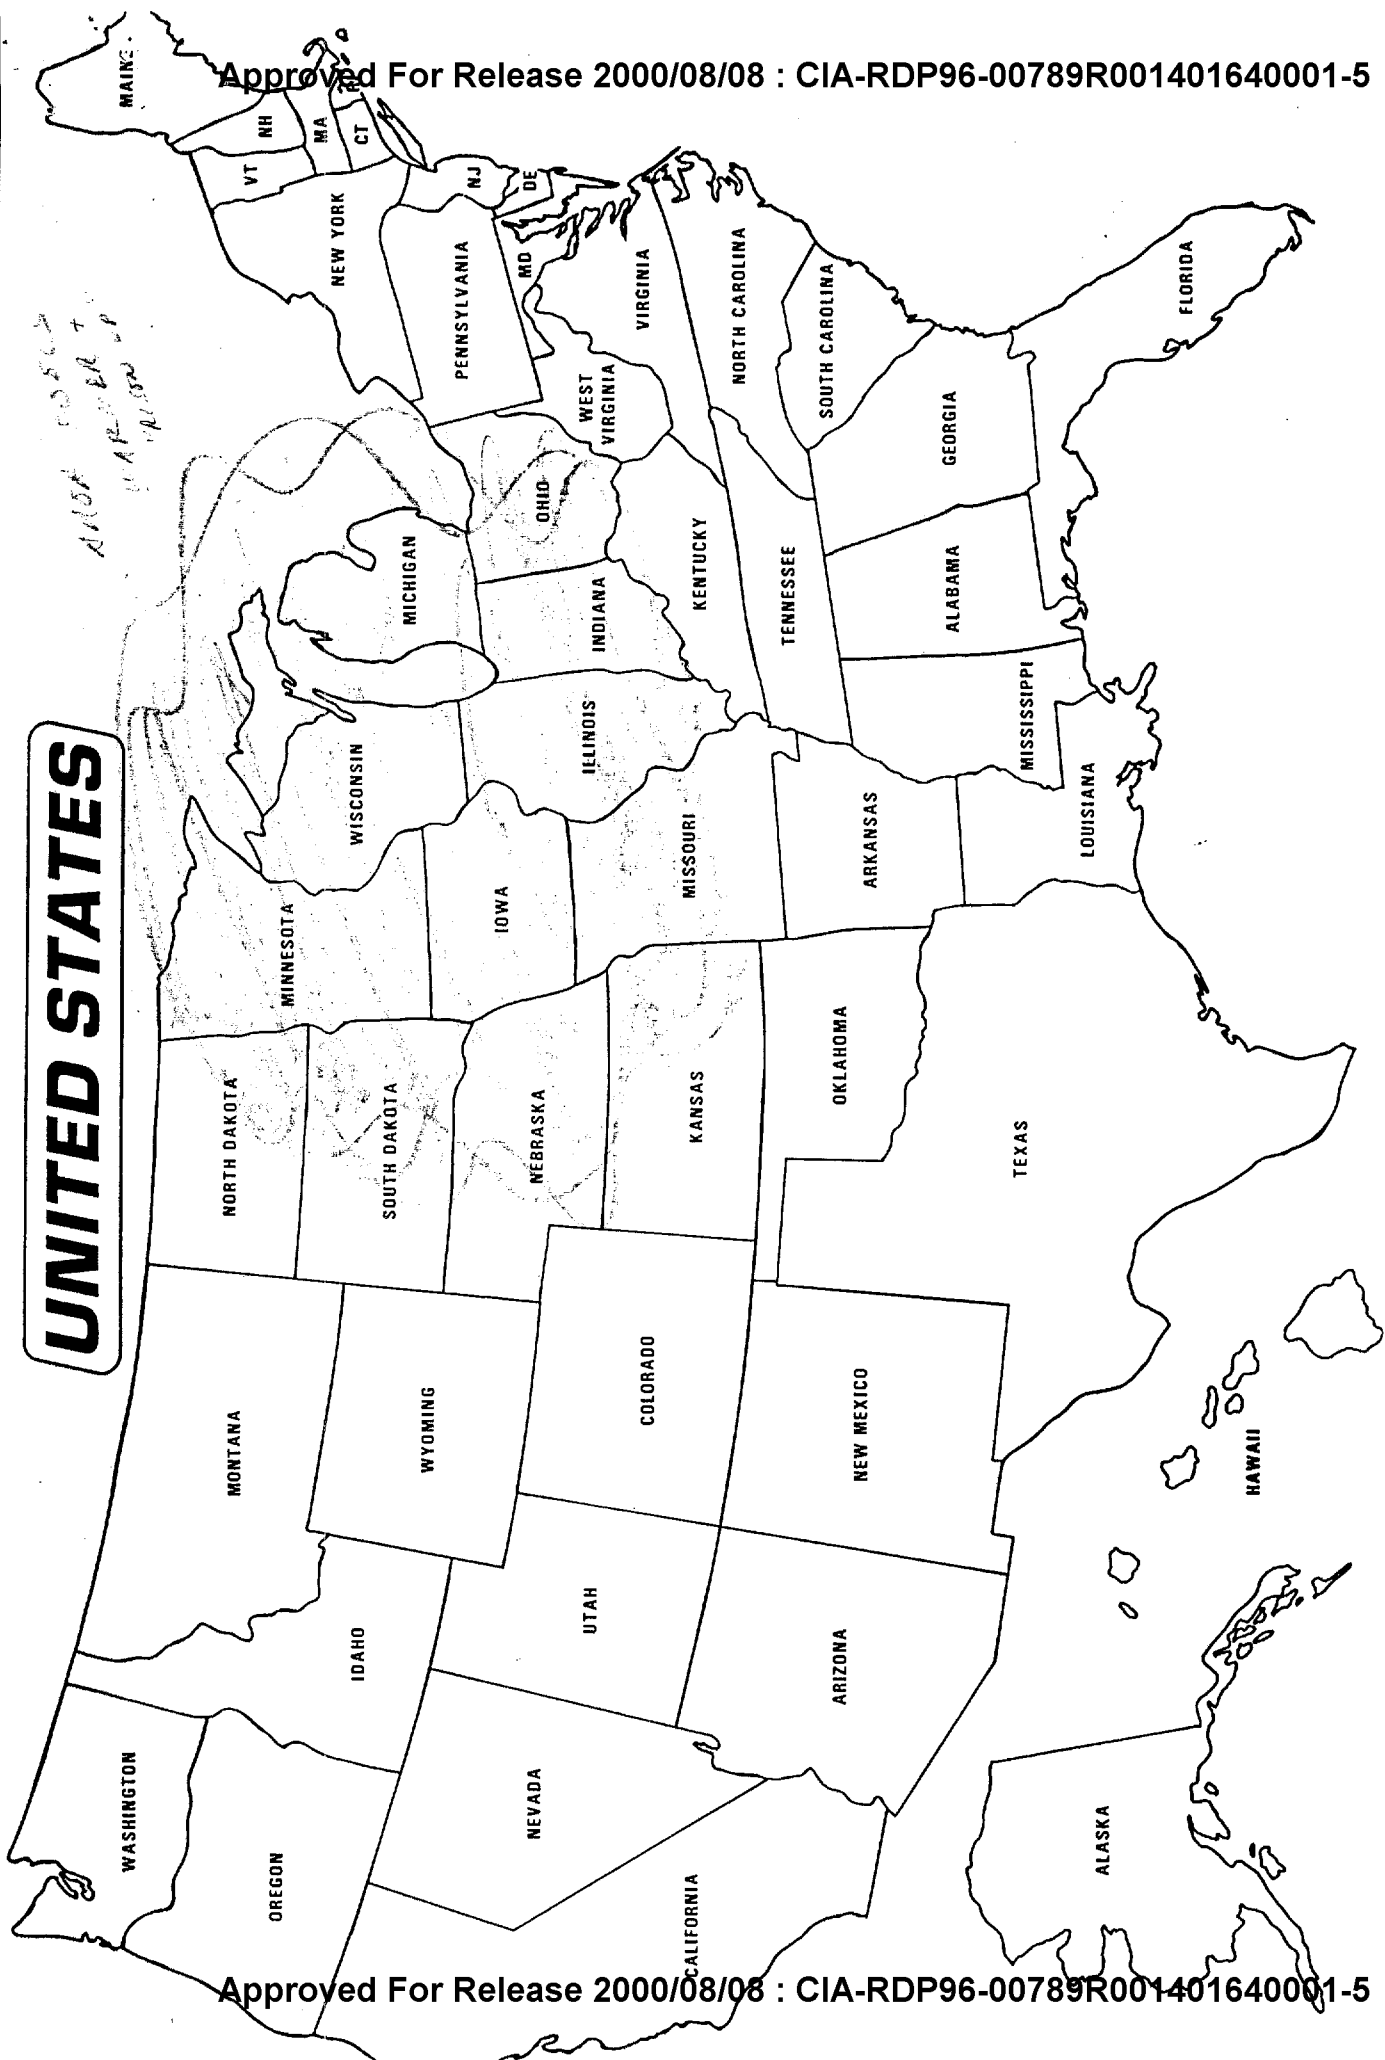

1. (S/NF/SK) I reaccessed "target", and again found a wide, open, sandy area with low, even vegetation. The "stuffy" feel to the air was gone.
2. (S/NF/SK) I tried to get more physical descriptors of the target person. He is past middle age, chunky, and has some white hair. He is a very artistic person, quite intelligent and well educated. For some reason that I have not tried to analyze, there is a strong impression about him of "raveling/unraveling".
3. (S/NF/SK) About 20 minutes into the session, a large mower began mowing around the building, and continued to do so. I tried to dowse, and got a vague and general impression of northern U.S., just east of central (see map, page 4). However, this was so tenuous that I do not trust it, and covered such a large area that I cannot be satisfied with it. I will do a 3rd session to perform actual dowsing. The session was finally called because of all the noise around the building.

WORKING PAPER

Project: 8974
Date: 890711
Viewer: 018
Session: 03

SUMMARY OF INFORMATION:

1. (S/NF/SK) The target person and his surroundings were accessed before dowsing began.
2. (S/NF/SK) Five methods of dowsing were performed, two of which produced absolutely no dependable results, at all. The other three methods were all performed blind, and all produced a high degree of correlation (see points 1,3,4,&5 on the dowsing map, page 8A). The area located is in the area around the junction point of North Dakota, South Dakota, and Minnesota (see sketch, page 10).

Target is LA, California
